The diagram illustrates a rainwater harvesting system. A building is connected to a rainwater pipe that leads to a filter bed (20"x20"x30"). The filter bed is shown in a plan view, revealing its internal structure: concrete slabs, sand, and brick bats. Water from the filter bed flows through outlets into a bore well.

Prepared from the registers named on the page each finding sits on. Where a register could not be read, this document says so in its place rather than leaving the gap to be read as a clean result.
