TOILET

[illegible][illegible]

The diagram consists of two parts: a cross-section (top) and a plan view (bottom).

Cross-section (top): This view shows the vertical structure of the septic tank. At the top, a "vent pipe" is shown extending from the tank. The structure is composed of several layers: an "R.C.C WALL" (Reinforced Cement Concrete wall) with a thickness of 0.46, a "P.C.C" (Plain Cement Concrete) layer with a thickness of 0.31, and a "SAND FILLING" layer with a thickness of 0.61. The total height of the structure is 0.81. The width of the tank is 6.24. The ground level (G.L.) is indicated on both sides.

Plan view (bottom): This view shows the top-down layout of the septic tank. The overall dimensions are 7.16 in width and 3.61 in depth. The internal dimensions of the tank are 6.24 in width and 2.74 in depth. The walls are 0.46 thick. A small square with an 'X' inside is located in the bottom right corner, likely representing a manhole or access point. The depth of the tank is labeled as 2.74 + 0.86 = 3.61.

Prepared from the registers named on the page each finding sits on. Where a register could not be read, this document says so in its place rather than leaving the gap to be read as a clean result.
