DIGITALLY VERIFIED RECORD

Water Resources Department

From
Er.M.Janaki, M.E., F.I.E,
Chief Engineer, WRD.,
Chennai Region,
Chepauk, Chennai - 5.
Email id: cecrwrdhdo@gmail.com

To
The Member Secretary,
Chennai Metropolitan Development Authority,
No.1, Gandhi Irwin Road,
Egmore, Chennai – 600 008.

Letter No.DB / T5(3) / F.NOC 2014 Puthur village3437/ 2024/ dated.05.05.2025.

Sir,

Sub: CMDA – Area Plan Unit – Layout Division – Proposed Laying out of house sites at S.No. 1/2A, 2B, 2C, 2D, 2E, 2F & 2G of Puthur Village, Tambaram Taluk, Chengalpattu District, Kattankulathur Panchayat Union limit - Technical report along with NOC on inundation point of view – issued – regarding.

Ref: 1.The Member Secretary, CMDA, Chennai-8 Letter No. CMDA / PP / Layout-1 / 0367 / 2024 / Dated: 31.December.2024.
2.The Applicant R.Anirudh (POA), No.98/99,Habibullah Road, Chennai-17 /Dated: 11.03.2025.

*****

With reference to the 1st and 2nd letter cited above and after careful consideration the technical opinion and NOC on inundation point of view of this department is hereby accorded for Planning Permission for Laying out of house sites comprised in S.No. 1/2A, 2B, 2C, 2D, 2E, 2F & 2G of Puthur Village, Tambaram Taluk, Chengalpattu District, Kattankulathur Panchayat Union limit in favour of R. ANIRUDH, Door No.98, Plot No.99, Address: Habibullah Road, Locality: T.Nagar, Chennai-600 017.

The proposed site was inspected and field observation reveals that, the water body in S.F.No. 37 abuts on the site on Eastern and Southern side. The site is surrounded by Residential buildings on all the direction and the Existing Road on Western side of the site which traverses and connects to Tambaram Bye pass Main Road on Northern side of the site. Accordingly to Revenue records, these lands are classified as "Dry" lands.

The applicants' land seems to be Ryotwari land, which would be classified as Dry lands and it is mentioned as Puthur tank submerged condition site as per Revenue records whereas CMDA has not informed land details in accordance with Second Master Plan which is already reclassified as Primary Residential Area for the submerged site condition, moreover during site inspection it is assessed that surrounding area was urbanized as per Second Master Plan, as well as the applicant should not disturb the existing catchment drains to the tank and if so that should be re-aligned within the site for free flow of water to the tank during rainy season without any

7/5/25

hindrance. In this regard the CMDA / Revenue department should verify & ensure before approval of Layout of above land since Layout issue lies entirely discretion of CMDA and WRD will not be held responsible at any cost regarding Layout of above land since WRD issuing NOC regarding inundation point of view as per site condition. Further this case should not be considered or treated as precedent for any other cases in future. The applicants' lands are seems to be Ryotwari land which would be classified as Dry lands. Hence, these lands are to be converted into other zone from the agricultural zone by the competent authority. The applicant should get clearance certificate for this site from the Revenue department to make sure that the site is not an encroached property from the water body as well as confirming this proposed site boundaries.

In order to ascertain the gravity of inundation of the said lands, the field levels were taken from the Crest level of Puthur Thangal (+)9.140m. As a safety measure, the proposed site must be analyzed with respect to the flood levels experienced during past floods. It is observed that MFL near the site during past floods is (+) 10.180m and The Existing approach Road Level (+)9.800m. The present ground level of the applicant site varies from (+)9.210m to (+)9.280m. The Full Tank Level (FTL), Maximum Water Level (MWL) of the Puthur Thangal which is located at the South – Eastern side of the applicant site level is (+)9.140m and (+)9.750m respectively.

Under this circumstances, the historical rainfall of 2015 (i.e 2100mm per Annum), the entire surrounding lakes had a surplus, in order to overcome any possibility of inundation. It is suggested that the ground level of the site under reference should be raised to a minimum level of (+)10.750 m (i.e., 1.61m above the Full Tank Level (FTL) of the (+)9.140 Puthur Tank) so as to avoid inundation during the rainy season against floods (ie., 1.00 m above the MWL of Tank as (+) 9.750 m + 1.00 m = 10.750 m)

The field levels were taken at the proposed site and furnished for reference as below:

Sl.No	Field Survey Number	Existing Field Level in m	Required height of filling with respect to the Full Tank Level (+) 9.140+ 1.61m = (+)10.750m	
			Required Level in m	Height Filling in m
1	1/2A	(+)9.210	(+)10.750	(+)1.540
2	1/2B	(+)9.260		(+)1.490

13/5/25

3	1/2C	(+)9.210		(+)1.540
4	1/2D	(+)9.230		(+)1.520
5	1/2E	(+)9.210		(+)1.540
6	1/2F	(+)9.280		(+)1.470
7	1/2G	(+)9.240		(+)1.510

Also the proposed land is to be raised from 1.470m to 1.540m with hard earth with proper consolidation to avoid inundation problem during rainy season. Since, the existing field level are below MFL and the applicant is suggested not to have regular habitation below MFL.

Based on the available Revenue records as well as site conditions, "No Objection Certificate" with a specific remark on the inundation point of view of this department for Laying out of house sites comprised in S.No. 1/2A, 2B, 2C, 2D, 2E, 2F & 2G of Puthur Village, Tambaram Taluk, Chengalpattu District, Kattankulathur Panchayat Union limit in favour of R. ANIRUDH, Door No.98, Plot No.99, Address: Habibullah Road, Locality: T.Nagar, Chennai-600 017 is hereby issued to CMDA subject to the following Conditions and technical suggestions besides any other mandatory clearance and statutory permission from any other organization (or) department for the consideration of planning permission by Chennai Metropolitan Development Authority.

Conditions:

1. The existing ground level of the site should be raised to minimum level of (+)10.750m (ie.,1.61m above the Crest level of Puthur Thangal (+)9.140m) with filling varies from 1.470m to 1.540m with layers of not more than 0.30 metre depth to achieve required degree of compaction to the entire area of the applicant land to avoid inundation during the heavy rains. The all-round pavement level within site should not be less than (+)10.750m. The regular habitation should not be below MFL. Also, the applicant should provide emergency pumping operation for the seepage water, if it is proposed to have basement floor and as well as dewatering arrangements during flood periods.

2. The applicant should clearly demarcate the boundary especially on South & Eastern side of their land before commencement of any developmental activities in the presence of Revenue authorities and WRD authorities. The applicant should also

5/5/25

maintain the measurement of the Revenue records without any encroachments and should be maintained as per Revenue records (FMB).

3. The permission granted to the applicants, should not be altered / modified / changed to any others. Based on the records submitted by the applicants, the permission is granted. If any documents seem to be fake / manipulated / fabricated, in future the above permission will be cancelled without any correspondence. Hence, the applicants are solely responsible of genuinety of the documents submitted.

4. The WRD officers should be allowed to inspect the site at any time, during execution and thereafter, if necessary. Advance intimation should be given to the WRD officers concerned before commencement of work.

5. The applicants should abide by the rules and regulation of the WRD from time to time. The applicants should also abide court of law of both State & Central Government from time to time.

6. WRD is giving opinion only in connection with the inundation aspect and does not deliver any rights to the applicants to encroach the WRD / Government Lands /Channel/ river. The NOC for this site from the WRD is purely issued on the basis of inundation point of view.

7. The applicants' land seems to be Ryotwari land, which would be classified as Dry lands and it is mentioned as Puthur tank submerged condition site as per Revenue records whereas CMDA has not informed land details in accordance with Second Master Plan which is already reclassified as Primary Residential Area for the submerged site condition, moreover during site it is assessed that surrounding area was urbanized as per Second Master Plan, as well as the applicant should not disturb the existing catchment drains to the tank and if so that should be re-aligned within the site for free flow of water to the tank during rainy season without any hindrance. In this regard the CMDA / Revenue department should verify & ensure before approval of Layout of above land since Layout issue lies entirely discretion of CMDA and WRD will not be held responsible at any cost regarding Layout of above land since WRD issuing NOC regarding inundation point of view as per site condition. Further this case should not be considered or treated as precedent for any other cases in future

8. The applicant should not object at any time for the maintenance work / improvements work of the tank to be carried out by WRD. The applicant should not dump the garbages / debris in the Tank and avoid the sewage water into the channel, etc,. The applicant should give an undertaking in writing to the effect that the above

5/5/25

proposal will not obstruct in case any maintenance/improvement/ development works as per Revenue records [FMB] are to be carried out by WRD in future periodically

Technical Suggestion:

(a). The applicants should prepare the layout proposal by considering the suitable internal storm water drainage network drain as micro drains i.e peripheral drain of suitable size not less than 1.20m x 0.90m & lateral drain of suitable sizes within the site as per the site condition and the same should be connected to the local drain at their own cost, rainwater harvesting, roads with side drain and sewerage treatment plant and its disposal & garbages / debris and other solid waste management as per norms in existence within the applicants' land, according to the existing rules in force and should get proper approval from the competent authority without fail.

The sewage or any unhygienic drainage (Treated or Untreated) should not be let into drain / channel / course at any cost and the debris and other materials should not be dumped into the drain / surplus course obstructing free flow of water. The applicants should make drainage network, at their own cost and the same is to be connected to natural storm water drainage / channel. There should not be any hindrance to the free flow of internal drain to downstream.

(b). The necessary setback distance not less than 3.00m especially on Eastern and Southern Side in existence and as per the rules in force of CMDA (as per the circular issued by the office of the Commissioner of Town & Country Planning, Chennai – 2 vide Roc.No.4367 / 2019–BA2 / Dated: 13.03.2019) during development and there should not be any construction activities in future also, the CMDA should issue completion certificate only after obtaining compliance report for NOC from WRD.

(c). The applicants' lands are seems to be Ryotwari land which would be classified as Dry lands. Hence, these lands are to be converted into other zone from the agricultural zone by the competent authority. The applicant should get clearance certificate for this site from the Revenue department to make sure that the site is not an encroached property from the water body as well as confirming this proposed site boundaries.

(d). The sewage water from the applicants' land should not let into the drain and for the disposal of the sewage water, suitable arrangements should be made for the same by the applicants, and as well as the construction materials / debris / garbages should not be dumped into the River / Eri / Channel / Pond at any cost.

At any cost, sewage / sullage should not be let into River / Eri / Channel / Pond, and the garbages, debris and construction materials should not be dumped into the River / Eri / Channel / Pond restricting the free flow of water.

The owner of the document received from the applicants in respect to the ownership is purely of applicants' responsibility and it is only for reference purpose to this department. The legal validity of this document should be verified by the Development / Revenue authorities. The specific remarks on inundation are purely issued on technical grounds in respect to the physical location of land.

Failing to comply with any of the above conditions, WRD reserves rights to withdraw the Technical opinion on inundation point of view to the above proposed site and in event, the applicants shall not be eligible for any compensation whatsoever and as well as legal entity.
