## STABILITY CERTIFICATE

1.The detailed engineering and structure design of the proposed building comprising of **Stilt+5 floors** at (OLD S.No: 194/3pt at Ammapalayam village) **WARD- 'A' BLOCK -12 ,TS No: 15/26** at Jagir Ammapalayam Village ,Salem City municipal Corporation Limit ,Salem District has been done by me/us based on the report of geotechnical investigation (soil test) done by **Surrya Builders. 2024-2025 01/015** dated **19-01-2024** and considering the functional requirement of the building.

2. It is certified that among other factors, the proposed building has been designed to resist earthquake. I/We have checked various parameters and found that the proposed building would be safe.

3. I/We further certify that:

(i) The minimum grade of concrete is M25.

(ii) The design and analysis has been done using the code of practice for plain and reinforced concrete as per IS 456, design loads as per IS 875 Part 1&2 and design of earthquake resistant structure as per IS Code 1893 Part 1

4. The building will be safe and sound when used for the purpose for which it is designed.

Chapter 1

## 1.1 INTRODUCTION:-

The purpose of this report is to outline the design philosophy and loading calculation along with analysis and design of the proposed Apartment building at the Salem.

The building includes the size of 24.81 m x 30.18 m.

## 1.2 General

This document details the input data, principles, methods and performance criteria to be used in the structural engineering design of the project for MR. SIDESH KUMAR.

## 1.3 Scope

The structure is a slit, ground and four floor for residential area. This report presents details of structural analysis and design of the structure. The sizes and details of the sections of structural elements are based on detailed analysis. This report specifies the details of structural layout, mathematical model, material properties, loads , load combinations and design of members.

Chapter 2

## LOADS & LOAD COMBINATIONS

## 2.1 General

This chapter discusses applicable loading for structural analysis & design of the proposed building. The loading is classified and described in the following paragraph

### 2.2.1 Dead load (DL)

This comprises of self-weight of various structural elements indicated below:

- Self-weight of columns and Beam members.of the modeled elements is calculated by STAAD Pro through SELF WEIGHT command.

- Self-weight of slab, floor finish and wall is applied explicitly as floor and member load.

Slab load :-

Slab load (125mm Tk) - 0.125x25 = 3.125 kN/sq.m,

Floor finish = 1.5 kN/sq.m,

Total load = 4.625 kN/sq.m.

### 2.2.2 Live Loads (LL)

Loads are considered slab area is 2.0 kN/sq.m.

## 2.3 LOAD COMBINATIONS

### 2.3.1 LOAD NAME AND COMBINATIONS ADOPTED FOR DESIGN

| Number | Name | Type |
|---|---|---|
| 1 | DEAD LOAD | Dead |
| 2 | LIVE LOAD | Live Load |

**Strength combination:-**

| Comb | Combination L/C Name | Primary | Primary L/C Name | Factor |
|---|---|---|---|---|
| 3 | 1.5(D.L+L.L) | 1 | DEAD LOAD | 1.5 |
| | | 2 | LIVE LOAD | 1.5 |

**Serviceability combination:-**

| Comb | Combination L/C Name | Primary | Primary L/C Name | Factor |
|---|---|---|---|---|
| 4 | 1.0(D.L+L.L) | 1 | DEAD LOAD | 1.0 |
| | | 2 | LIVE LOAD | 1.0 |

Chapter 3

# ANALYSIS

## 3.1 General

The analysis of the structure is carried out by mathematical modeling of the structure in STAAD Pro and performing an analysis run.

## 3.2 Mathematical Modeling of Structure

The Proposed structure is modeled and analyzed using STAAD Pro. The physical structure of building is transformed into a mathematical model for structural analysis using 3D frame elements. Entire structure is framed of integrated three dimensional structure of columns and beams forming frames tied together to act as one unit responding to the loading on the structure. The discretization of the structure involves structural components such as Column, and beams.

Chapter 4

# DESIGN OF MEMBERS

## 4.1 General

Elements are designed as per IS: 456-2000 for combination of loads in the analysis of STAAD Pro.

Chapter 1

## 1.1 INTRODUCTION:-

The purpose of this report is to outline the design philosophy and loading calculation along with analysis and design of the proposed Apartment building at the Salem.

The building includes the size of 17.45 m x 23.62 m.

## 1.2 General

This document details the input data, principles, methods and performance criteria to be used in the structural engineering design of the project for MR. SIDESH KUMAR.

## 1.3 Scope

The structure is a slit, ground and four floor for residential area. This report presents details of structural analysis and design of the structure. The sizes and details of the sections of structural elements are based on detailed analysis. This report specifies the details of structural layout, mathematical model, material properties, loads , load combinations and design of members.

Chapter 2

## LOADS & LOAD COMBINATIONS

## 2.1 General

This chapter discusses applicable loading for structural analysis & design of the proposed building. The loading is classified and described in the following paragraph

### 2.2.1 Dead load (DL)

This comprises of self-weight of various structural elements indicated below:

- Self-weight of columns and Beam members.

Self-weight of the modeled elements is calculated by STAAD Pro through SELF WEIGHT command. The self-weight of purlin and Roof sheet is applied explicitly as member load.

Slab load :-

Slab load (150mm Tk) - 0.125x25 = 3.125 kN/sq.m,

Floor finish = 1.5 kN/sq.m,

Total load = 4.625 kN/sq.m.

### 2.2.2 Live Loads (LL)

Loads are considered slab area is 2.0 kN/sq.m.

## 2.3 LOAD COMBINATIONS

### 2.3.1 LOAD NAME AND COMBINATIONS ADOPTED FOR DESIGN

| Number | Name | Type |
|---|---|---|
| 1 | DEAD LOAD | Dead |
| 2 | LIVE LOAD | Live Load |

**Strength combination:-**

| Comb | Combination L/C Name | Primary | Primary L/C Name | Factor |
|---|---|---|---|---|
| 3 | 1.5(D.L+L.L) | 1 | DEAD LOAD | 1.5 |
| | | 2 | LIVE LOAD | 1.5 |

**Serviceability combination:-**

| Comb | Combination L/C Name | Primary | Primary L/C Name | Factor |
|---|---|---|---|---|
| 4 | 1.0(D.L+L.L) | 1 | DEAD LOAD | 1.0 |
| | | 2 | LIVE LOAD | 1.0 |

Chapter 3

# ANALYSIS

## 3.1 General

The analysis of the structure is carried out by mathematical modeling of the structure in STAAD Pro and performing an analysis run.

## 3.2 Mathematical Modeling of Structure

The Proposed structure is modeled and analyzed using STAAD Pro. The physical structure of building is transformed into a mathematical model for structural analysis using 3D frame elements. Entire structure is framed of integrated three dimensional structure of columns and beams forming frames tied together to act as one unit responding to the loading on the structure. The discretization of the structure involves structural components such as Column, and beams.

Chapter 4

# DESIGN OF MEMBERS

## 4.1 General

Elements are designed as per IS: 456-2000 for combination of loads in the analysis of STAAD Pro.

THE LANDLENS SUITE

# Eight ways to know a piece of land before you pay for it.

This report covers one part of the picture. These cover the rest, drawn from the same government records, for any property in Tamil Nadu.

### LandLens One
Ask anything about a property and get an answer grounded in live government records, with the sources shown.
**/landlens/one**

### Verify My Land
Every record check run on one property and returned as a single report.
**/landlens/verify-my-land**

### Legal Opinion
An advocate's written opinion on the title, built on the records we pull for it.
**/landlens**

### One Map
Every layer on one map: the parcel, its boundary, zoning, water bodies and what sits around it.
**/landlens/one/map**

### PriceMap
What land actually changed hands for around this plot, taken from the registered deeds.
**/landlens/pricemap**

### Build Scope
What you are allowed to build here: floor space, height, coverage and setbacks.
**/landlens/build-scope**

### Property Tracker
Watch a property and hear about it when something new is registered against it.
**/landlens/property-tracker**

### Deal Room
Run the transaction in one place: documents, stamping, signatures and the parties.
